## LIVESTRONG Male Fertility Preservation

**PRESERVE YOUR  
FERTILITY**

## Our History

Fertility Center of California (FCC) and Family Fertility CryoBank (FFCB) have been helping families preserve their fertility since 1980. Our goal is to help all families, regardless of financial standing, with the opportunity to expand their family. Challenges may, at times, impose heavy burdens; FCC and FFCB are here to alleviate any stress and make the process of fertility preservation simple and uncomplicated.

FCC and FFCB have your best interests in mind, with biometric laboratory security, cloud based monitoring equipment, and an impeccable Quality Assurance record—your reproductive tissue is always safe and secure. We store reproductive materials for people across the country. Allow us to help preserve your family dreams.

Dr. Martin Bastuba is the laboratory and medical director. Dr. Bastuba is a board-certified urologist who completed specialized Fellowship training in male reproductive medicine. He has devoted his medical practice to this area since 1993.

## Fee Schedule

|        | Storage Time |         |         |
|--------|--------------|---------|---------|
|        | 1 year       | 2 years | 3 years |
| 1 kit  | \$350        | \$650   | \$850   |
| 2 kits | \$450        | \$750   | \$950   |
| 3 kits | \$550        | \$850   | \$1,050 |

*\*Above pricing structure is for  
LIVESTRONG approved patients\*  
\*\* Payment Plans available upon request\*\**

**"There is no such thing as 'fertility friendly' cancer treatment drugs. The sooner you store your reproductive tissue, the better."**

**-Martin Bastuba, MD**

### ***\*FCC and FFCB Guarantee\****

Our company strives to provide the highest quality cryopreservation services with the most affordable rates. Patient satisfaction is paramount to our business model. We achieve this by providing a thorough review of each and every specimen with every patient.

## Steps towards your appointment

- 1** 2-5 days of sexual abstinence is recommended
- 2** Call 619-265-0102 and make an appointment, Monday - Friday, 8AM - 3:30PM
- 3** Produce specimen on- or off-site
- 4** Receive results via phone and email (if requested)
- 5** Financial payment plans available

## Cryopreservation Information

- Three (3) types of artificial reproduction techniques exist. Intra-cervical (\$100), intra-uterine insemination (\$400), and in-vitro fertilization (\$10K-25K)
- Specimen is provided to FCC with an in-office or at-home collection in a sterile collection container
- Preliminary analysis performed
- Patient consult occurs to determine best course of action for sample with respect to how the patient intends to use the sample
